Handling and dispensing silicone oil during vitreo retinal surgery has, in the past, created problems relating to;

- Messy silicone oil residue on gloves and instruments -
- Wastage of oil when decanting into a syringe -
- Air bubbles -
- Time taken in decanting setup & dispensing -
- Cost of separate components -

The LSO Silicone Oil and QuickSet 'Combo Pack' eliminates many of these issues by giving you one sterile pack that contains a pre-filled syringe, connected to a pressure tube kit that will fit onto most automated oil pump machines

'Combo Pack'

Use the Combo Pack and

- Save time in set-up
- No pouring of oil required
- No messy oil residue from decanting
- No wasted oil left in a vial
- Fits most machines
